Claims 5-17 and 19-21 are pending in this application with claims 6, 8-10, 12-15, 17 and 21 held withdrawn from consideration. The rejection of the claims under 35 U.S.C. 112, second paragraph is withdrawn in view of applicants' amendments.

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

This application currently names joint inventors. In considering patentability of the claims under 35 U.S.C. 103(a), the examiner presumes that the subject matter of the various claims was commonly owned at the time any inventions covered therein were made absent any evidence to the contrary. Applicant is advised of the obligation under 37 CFR 1.56 to point out the inventor and invention dates of each claim that was not commonly owned at the time a later invention was made in order for the examiner to consider the applicability of 35 U.S.C. 103(c) and potential 35 U.S.C. 102(e), (f) or (g) prior art under 35 U.S.C. 103(a).

Claims 5, 7, 11, 16 and 19-20 are again rejected under 35 U.S.C. 103(a) as being unpatentable over Clifford et al., Chem. Abst. 130:232097 or D'Ambrosio, Chem. Abst. 134:65874, in view of Konig et al., DE 2,300,1007 for the reasons of record. Applicants' arguments have been given due consideration, but are considered non-persuasive. Applicants show how each of the references differ individually from the instant invention, but under 35 U.S.C. 103, the obviousness test is whether it would have been obvious to do what applicants' did given the teaching of the prior art taken as

Art Unit: 1621

a whole. In re Metcalf et al. 157 U.S.P.Q. 423. Regarding Konig et al., DE-107 discloses R¹ and R² may be a substituted phenyl group and in the second full paragraph on page 3 disclose substitution may be through one or more of various substituents including those overlapping applicants (s. p. 2, second paragraph from the bottom and page 3, second full paragraph). Applicants' specification does not show superior results for compound 18, but merely shows greater than half of the activity of the 4-HPR standard. Applicants' claims also cover compounds for which no activity was detected or for which the activity was equivalent to the vehicle (s. for example compound 16 in which the hydroxyl and nitro substitution are switched).

The following is a quotation of the first paragraph of 35 U.S.C. 112:

The specification shall contain a written description of the invention, and of the manner and process of making and using it, in such full, clear, concise, and exact terms as to enable any person skilled in the art to which it pertains, or with which it is most nearly connected, to make and use the same and shall set forth the best mode contemplated by the inventor of carrying out his invention.

Claims 19 and 20 are again rejected under 35 U.S.C. 112, first paragraph, as failing to comply with the enablement requirement for the reasons of record. The claim(s) contains subject matter which was not described in the specification in such a way as to enable one skilled in the art to which it pertains, or with which it is most nearly connected, to make and/or use the invention. Applicants' arguments have been given due consideration but are found non-persuasive. Applicants claim compounds in their genus having no in which no activity was detected or for which the activity was equivalent to the vehicle.

No claim is allowed.

THIS ACTION IS MADE FINAL. Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

A shortened statutory period for reply to this final action is set to expire **THREE MONTHS** from the mailing date of this action. In the event a first reply is filed within **TWO MONTHS** of the mailing date of this final action and the advisory action is not mailed until after the end of the **THREE-MONTH** shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than **SIX MONTHS** from the mailing date of this final action.

Any inquiry concerning this communication should be directed to Peter G. O'Sullivan at telephone number (571)272-0642.
